	ACTIVATION				INSIGHTS / ANALYTICS	
	MULTIPLE	STREAMING	EXPERIENCES	STUDIO/AD	CORP BRAND	CORP BRAND
Use Case	#1 Incremental Audiences	#2 Re-engagement via Park & Cruise Experiences	#3 DX Activation Personalization	#4 Drive Efficiency of Enterprise Synergy	Workstream: Profile / Household Unification (Enterprise ID)	#5 Disney 'Fan' Model
What we are trying to achieve	Across business segments, cross-sell or up-sell to net new customers by identifying opportunistic incremental audiences and promoting relevant experiences (e.g., sale of DX experiences to net new, relevant Streaming subs).	Re-engage lapsed Disney+ subscribers by leveraging experiential data. Trigger personalized content journeys based on guests' parks visits or cruises (e.g., Star Wars content after a Galaxy's Edge visit).	Drive increased engagement and conversion of current/past guests by personalizing creative and messaging based on known Affinities (Franchise, Character, Sports, Content Genre)	Identify who is being reached (and not reached) across enterprise Synergy campaigns, and overall effectiveness (conversion events). Deliver audiences for suppression on Paid marketing (to drive efficiency).	Identify reconciliation across TWDC, regardless of source (known & anonymous), at the Profile and HH level. Unified view of enterprise relationships to drive more effective cross/up sell.	Develop Fandom model that incorporates multiple lines of business. Identify profiles by the number of touchpoints they interact with across TWDC and track migration/spend over time.
KPIs	Incremental acquisition	Engagement & Retention (reduce Churn)	Parks Engagement and/or Purchase	Marketing savings	Match rate & % reduction of total uniques	Model efficacy

*This one was shifted from a use case to a workstream

Use Case #1 - Incremental Audiences

- **Description:** Across business segments, cross-sell or up-sell to net new customers by identifying opportunistic incremental audiences and promoting relevant experiences (e.g., sale of DX experiences to net new, relevant Streaming subs).
- **Key Components:**
 - Broad catalog of customer data attributes from across TWDC business segments shared to Atlas (Data Enrichment/Reconcile Data Gaps workstream)
 - Legal and Business approval for each attribute for specific use case (Data Governance/Pre-Approved Use Cases workstream)
 - Compass integration for specific use case (Technology Stack/Activation Infrastructure workstream)
- **Sequencing:**
 - Phase 1
 - Complete as first foundational use case for Atlas
 - Catalog of customer data attributes can also feed into use cases #2 and #3

Use Case #2 - Re-engagement via Park & Cruise Experiences

- **Description:** Re-engage dormant or low-engagement Disney+ subscribers by leveraging real-world experiential data. Trigger personalized Disney+ content journeys based on guests' visits to Disney parks or cruises (e.g., Star Wars content after a Galaxy's Edge visit).
- **Key components:**
 - Broad catalog of customer data attributes from across TWDC business segments shared to Atlas (Data Enrichment/Reconcile Data Gaps workstream)
 - Legal and Business approval for each attribute for specific use case (Data Governance/Pre-Approved Use Cases workstream)
 - Compass integration for specific use case (Technology Stack/Activation Infrastructure workstream)
- **Sequencing:**
 - Phase 1
 - Complete as second foundational use case for Atlas
 - Expand upon attributes, approvals, and Compass features created for use case #1

Use Case #3 - DX Activation Personalization

- **Description:** Drive increased engagement and conversion of DPEP current/past guests by personalizing creative and messaging based on known Affinities (Franchise, Character, Sports, content genre). This will be performed primarily through use of XLOB data.
- **Key Components:**
 - Broad catalog of customer data attributes from across TWDC business segments shared to Atlas (Data Enrichment/Reconcile Data Gaps workstream)
 - Legal and Business approval for each attribute for specific use case (Data Governance/Pre-Approved Use Cases workstream)
 - Compass integration
- **Sequencing:**
 - Phase 1
 - Complete in parallel with Use Case #2
 - Expand upon attributes and approvals for use case #1

Use Case #4 - Drive Efficiency of Enterprise Synergy

- **Description:** Identify who is being reached (and not reached) across enterprise Synergy campaigns, and overall effectiveness (delivery, open, click, conversion). Deliver audiences for suppression on Paid marketing (to drive efficiency).
- **Key Components:**
 - Inventory of synergy touchpoints (Technology Stack/Inventory of Touchpoints deliverable)
 - Campaign activities including delivery, opens, clicks, and conversions shared to Atlas (Data Enrichment workstream)
 - Compass integration for specific use case (Technology Stack/Activation Infrastructure workstream)
- **Sequencing:**
 - Phase 2

Use Case #5 – Disney ‘Fan’ Model

- **Description:** Develop Fandom model that incorporates multiple lines of business. Identify profiles by the number of businesses they interact with across TWDC and track migration/spend over time.
- **Components:**
 - Broad catalog of guest interactions with business units shared into Atlas (Data Enrichment workstream)
 - Broad catalog of purchase data shared into Atlas (Data Enrichment workstream)
 - DDSI Data Models (Insights Processes workstream)
 - BI tool integration (Technology Stack/Analytics/Insights Infrastructure workstream)
- **Sequencing:**
 - Phase 2

Use Case #6 – Next Best Action

- **Description:** Identify 'Next Best Action' pathways based on where a guest entered the TWDC ecosystem and ongoing activities. Help businesses understand where to prioritize marketing efforts for the best return.
- **Components:**
 - Broad catalog of guest interactions with business units shared into Atlas (Data Enrichment workstream)
 - Broad catalog of purchase data shared into Atlas (Data Enrichment workstream)
 - DDSI Data Models (Insights Processes workstream)
 - Financial components of lifetime value (TBD)
 - BI tools integration (Technology Stack/Analytics/Insights Infrastructure workstream)
- **Sequencing:**
 - Phase 2

Workstream: Profile and HH Unification

- **Description:** Identity reconciliation across TWDC, regardless of source (known & anonymous), at the Profile and HH level. Unified view of enterprise relationships to drive more effective cross/up sell.
- **Components:**
 - Survey of all identity unification methods used across TWDC (Identity Resolution/TWDC methodology assessment deliverable)
 - Assessment of pros/cons/risks/benefits of each approach and selection of best solution (Identity Resolution/Alignment on go-forward methodology deliverable)
 - Build out identity resolution capability (Identity Resolution/Identity Resolution Capability/API deliverable)
- **Sequencing:**
 - Begin building in Phase 1
 - Build out as a capability in parallel to the first three use cases
